

May Your Next Security Assessment Report be **Actionable**, and **Business-Risk-Prioritized**

You have tons of choices when selecting a security assessor. There are dime-a-dozen companies that would perform an “assessment” and provide you with “results”.

The main question is; how often do these assessors actually deliver the following:

- ! Business Context-Driven Results
- ! Risk-Based Vulnerability Scoring
- ! Executive Level Results Presentation
- ! Manual Tests, Not Just Tool-Based
- ! Testers with Industry Knowledge
- ! Vulnerabilities to Controls Mapping

When an assessor has the proper business and industry context, carries a deep understanding of technology and process, and has conducted hundreds of assessments for over a span of several years, is when an assessor produces results that are contextually scored, provide the necessary business justification for mitigation, and are actionable.

SECURITY CONTROLS WORK BEST WHEN INSTALLED AT TIME OF ASSEMBLY, NOT RETROFIT

SECURITY TESTING & VALIDATION SERVICES

BLUE TEAM COORDINATION FOR RESULTS DELIVERY

Our security testing and validation services integrate with our clients' **service lifecycle**, supporting a cost-effective approach to discovering and addressing systemic weaknesses. Starting with the Plan phase to ensure security is baked in from the start, all the way to the Improve phase where vulnerabilities are addressed for desired levels of **cyber hygiene**, we help our clients optimize their **business investments** and ensure a **risk-aligned** security posture.

NOT JUST VULNERABILITY ASSESSMENTS ...

Our team is deeply experienced with not only the traditional vulnerability assessment and penetration testing services, we can also assess **organizational risks** to your prized **data stores**, security of your internal or external **hosts**, confirm zoning strategy of your internal **networks**, and most importantly, reliability of your **web enabled applications**. Our web application testing services specifically include **static** and **dynamic testing**, **source code reviews**, and **mobile application** reviews.

ABOUT US

We discern the appropriate business **context**, apply deep **understanding**, and leverage best practice industry **experience** to successfully and sustainably deliver the holistic security posture and program.

Clients across a broad spectrum of industries have entrusted Trustmarq Global Services with their holistic security needs for the past two decades.
